The synergy of Chiropractic and Electromedicine

Hello and welcome to the Mar/Apr edition of our clinic newsletter. To our new patients, we are so pleased that you have chosen chiropractic care as part of your wellness program and know you will enjoy the journey to better health with us. I have recently returned from a chiropractic seminar in Australia and am excited to report that the world of chiropractic is healthy and on purpose as always. The **PEMF** (Pulsed Electro Magnetic Field) and **Rife** Frequency Generator is achieving remarkable results with our patients. The Galvanic Resonant Scanner (GRS) is a detection tool for parasites and pathogens which imbed themselves into our organs and cause many diseases and human dysfunction. We are also working to have the Rife Footbath Chair ready for use very soon which is an excellent form of detoxification. This clinic has embraced the Electro magnetic and frequency resonance treatment plans and I encourage you to talk to one of our staff about these exciting health options. My staff and I are looking forward to seeing your health improve this year.

Dr Les Whitehead

The Power of an Adjustment

The below Tytron Thermography scan is unique in that it is able to display areas of nerve irritation. In less than 15 seconds the Tytron can indicate areas that may be warm due to acute soft tissue damage, joint inflammation, disc protrusion, and other special related conditions. The first scan on the left was taken seconds before Dr Whitehead delivered an adjustment to a patient. The scan on the right was then taken immediately after the adjustment and it can be clearly seen that there has been a significant reduction in this patient's symptoms. These scans show the power of chiropractic care, since the health of the nervous system can determine the health of the body.

Whitehead Pain Relief Centre Hours

Mon: 7.15am - 5.30pm

Tue: 7.15am - 12pm

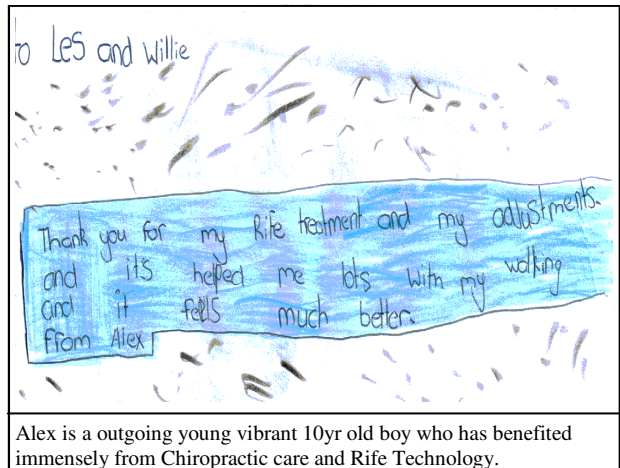

Wed: 7.15am - 3pm

Thu: 7.15am - 5.30pm

Fri: 7.15am - 12pm

"The person who takes medicine must recover twice, once from the disease and once from the medicine."

William Osler, MD

Alex is a outgoing young vibrant 10yr old boy who has benefited immensely from Chiropractic care and Rife Technology.

'Healthy citizens are the greatest asset a country can have'

Winston Churchill

'Rife Technology quite simply kills germs without harming the hosts body or Immune System'

Worldwide, Rife researchers have published programs for numerous conditions. We have received positive reports from people that Resonant Frequency sessions have assisted in controlling the pain or symptoms associated with Chronic Fatigue, Glandular Fever, Tinnitus, Candida/Thrush, Ulcers, Psoriasis, Shingles, Asthma, Migraines, Arthritis, Blood Pressure, various forms of Carcinoma, Fibromyalgia, Endometriosis, Giardia and Ankylosing Spondylitis, Cataracts, Headaches, Psoriasis, Stiff Muscles, Tinnitus, Sports Trauma, Warts, Ulcers, Influenza, to other less common ailments.

ANYONE WHO IS SICK COULD BENEFIT!

Rife is ultrasound not electricity or magnetism. This ultrasound is thousands of times less in intensity than the ultrasound they use in fetal exams. Yet, it is a million times stronger than the original ultrasound Dr. Rife used to kill his original pathogens with his plasma tube device. Rife is non-invasive in the sense that the skin

is not broken and there is no damage to normal, healthy tissues and cells etc. The frequencies scanned through are purposely only in the range that are harmful to bacteria, viruses, parasites, etc. Rife can be used synergistically with other treatment modalities without the danger of harmful interactions as with drug therapy. Rife can be focused on a specific physical location where other modalities could not penetrate without surgery, or without losing effectiveness, e.g., periodontal and dental problems like the inside of the teeth and gums, the lungs, the arteries and arterioles, bones, joints, ligaments, etc. Many diseases are now known to be caused and/or aggravated by "leaky teeth and gums". Rife is non-toxic (little or no side effects other than the standard kill-off effect, i.e. Herxheimer, caused by any modality that destroys pathogens and necessitates the body having to clean up and detoxify the mess; this is a well known and documented effect of any treatment that actually works!) as opposed to most drugs, and is non-damaging to normal tissue in contrast to surgery. It

has no ionizing radiation and so cannot cause damage to the immune system or DNA breakage, etc. Rife is currently being used by doctors in Germany and all over the world in conjunction with other effective therapies that have been declared illegal in the USA. Actually, there are 10 states and many brave practitioners in the US, who can use experimental modalities. However, Rife is unknown or very misunderstood. This may be due to the prejudice against electro-medicine that has been fostered and taught since the early 1930's with the advent of the FDA as an enforcer of drug-based, allopathic medicine. (There was a time when the Chiropractors had to fight for their very existence to become part of the mainstream). Rife is effective in most microbial-based diseases. For example, rife can be used in situations like rheumatic diseases where the pain-relieving results can seem mysterious until one realizes that rife works.

Parasites

Over 134 parasites can live in the human body. In fact, reviews of autopsies show that parasites may contribute to as much as 75% of all illness, although ordinary diagnostic tests may not detect the presence of worms and parasites. Parasite infestations can cause a dizzying array of symptoms. Some of the most common symptoms may include nausea, vomiting, constipation and diarrhea.

Important! Bacteria often live inside worms, and viruses live inside the bacteria inside the worms. So even if the worms are killed, you must still deal with the smaller microbes that play a role in the composite worm/bacteria/virus symptom picture. The Rife centre is able to detect parasites in the human body and produce a treatment plan. Speak to a staff member for any further information.

“No Matter what the illness or disease, I am sure to find only two things wrong: pollutants and/or parasites”

Dr. Hulda Clark

Expel those bad toxins today!

Everyday, our body is bombarded by harsh toxins and chemicals from our surrounding environment. Chemicals, electromog, pesticides, hormones and other pollutants are found in all the processed foods we eat, and often in the water we drink and the air we breathe. Although our bodies do have some inbuilt means of expelling toxins, there are now so many different substances passing into our bodies that the toxic burden is proving too great for many to deal with properly. These harmful substances have accumulated to such an extent in many of us that chronic illnesses are proliferating at both the physical and mental levels. Talk to a staff member about our detoxification sessions.
